

xEB — xd Elite Buffs

Official Mod Documentation & Assets Directory

Target Platform:	Minecraft Forge 1.20.1 (Forge 47.2.0+)
Mod ID:	xeb
Core Dependencies:	GeckoLib 4.x for 1.20.1
Documentation Generated:	June 2026

1. Icon & Visual Assets Directory

Visual design is a cornerstone of the xEB Elite Buffs mod. Both the custom visual medallions that float above entities and the active status effects require specialized textures located within the resource folders. Below is the strict directory mapping detailing where icons and frame textures are stored in the workspace assets.

Asset Type	Workspace File Path	Description
Bronze Medallion Frame	src/main/resources/assets/xeb/textures/entity/medallion_bronze.png	3D frame texture for COMMON tier medallions.
Silver Medallion Frame	src/main/resources/assets/xeb/textures/entity/medallion_silver.png	3D frame texture for RARE tier medallions.
Gold Medallion Frame	src/main/resources/assets/xeb/textures/entity/medallion_gold.png	3D frame texture for LEGENDARY tier medallions.
Inner Icon (Bronze)	src/main/resources/assets/xeb/textures/entity/medallion/bronze/icon_<buff_id>.png	Flat texture displayed in the center of the Bronze frame (e.g. icon_spiky.png).
Inner Icon (Silver)	src/main/resources/assets/xeb/textures/entity/medallion/silver/icon_<buff_id>.png	Flat texture displayed in the center of the Silver frame.
Inner Icon (Gold)	src/main/resources/assets/xeb/textures/entity/medallion/gold/icon_<buff_id>.png	Flat texture displayed in the center of the Gold frame.
Potion Effect Icons	src/main/resources/assets/xeb/textures/mob_effect/<effect_id>.png	HUD/Inventory status icons for custom effects (e.g. tarred.png, petrify.png).

2. Registered Elite Medallions & Environmental Interactions

The mod registers exactly 28 unique Elite Buffs. Each buff displays as a floating medallion, tints the host body with its respective color, glows the entity's eyes, and alters how the mob interacts with players and its environment. Below is the complete catalog:

Buff / ID	Color	Description & Environmental Behavior
	● #8B4513	Thorns effect: Reflects 2 damage to attackers. Bosses reflect 1 damage. Uses custom mobEvent damage source to prevent infinite damage loops.
Reactive (reactive)	● #FF6347	On taking damage, triggers a sonic boom shockwave dealing 2 magic damage to all entities in a 3-block radius with visual particles.
	● #DC143C	Grants permanent extra base attack damage (+2 for common, +1 for bosses) via attribute modifiers.
Tough (tough)	● #696969	Grants permanent extra armor (+2 for common, +1 for bosses) via attribute modifiers.
	● #4169E1	Grants a custom absorption shield (size scales with difficulty). Has a -20% Max Health penalty. Shield does not regenerate in combat.
Protected (protected)	● #FFD700	Spawns a Holy Shield that absorbs one hit completely. Regenerates 1 shield point every 20 ticks (1 second) when out of combat. -20% Max Health.
	● #00CED1	Grants a permanent +20% movement speed boost via attribute modifiers.
Flaming (flaming)	● #FF4500	Fire immune. Constantly places fire blocks below itself if passable. Bosses apply a custom stackable Burn effect to attackers on hit.
	● #32CD32	Inflicts Poison II for 3 seconds on melee hits. Leaves a trail of Creep/Poisonous ground blocks that poison players stepping on them.
Lucky (lucky)	● #FFD700	Grants +3 Luck attribute, a 10% chance to critically strike for double damage, and a 10% chance to dodge and completely negate incoming damage.
	● #FFFF00	Tracks movement: when the mob moves, it periodically releases chain lightning arcs dealing 1 lightning damage to entities within 2 blocks.
Bouncy (bouncy)	● #FF69B4	When damaged, applies a massive knockback to both the mob itself and the attacker, forcing spacing between them.
	● #C0C0C0	Grants the infinite Reflect potion effect. Automatically bounces projectiles back toward the shooter, taking 2 internal reflection damage per hit.
Resonant (resonant)	● #9370DB	When any player/entity finishes using an item (casting a spell/eating/using items) within 8 blocks, this mob gains +1 to all attributes and heals 1 HP.
	● #8B0000	One-time resurrection. Upon dying, cancels death, plays a revival sound and visual effect, and respawns 2 seconds later with 50% health.
Healthy (healthy)	● #228B22	Grants +4 Max Health and permanent regeneration, keeping the entity at full health over time.
	● #F4A460	Grants 10% dodge. Upon death, spawns a localized sandstorm (an Area Effect Cloud dealing weather damage to entities in a 5-block radius).

	● #556B2F	Upon death, explodes into a swarm of 3-5 Elite Fly entities that hover and attack players nearby, despawning after 30 seconds.
Absorbent (absorbent)	● #483D8B	Periodically drains 1-2 mana from nearby entities within 6 blocks and deals magic damage equal to the amount of mana siphoned.
	● #2F4F4F	Emits a dampening aura reducing all attributes of nearby players by 1 within 8 blocks (capped at max 2 active depressing sources per fight).
Slightly Depressing (slightly depressing)	● #708090	A minor variant of Depressing used on minions. Reduces all attributes of adjacent entities within 2 blocks by 1. No cap.
	● #7B68EE	Every 30 seconds (600 ticks), this mob mutates and acquires another random medallion (up to a maximum of 5 stacked medallions).
Plow (plow)	● #D2691E	Deals continuous trample collision damage to entities it walks through. When hurt, immediately leaps/lunges 1 block toward its attacker.
	● #FF1493	Increases model size. Modifies attributes for +50% max health, +50% damage, and attacks faster (effectively taking one less turn).
Mad (mad)	● #B22222	Attacks twice as fast. When it kills any entity, it heals 4 HP and permanently gains +1 to all primary attributes (damage, speed, armor).
	● #9400D3	Spawns with an identical clone sharing the same entity type and medallion set. Both twins have their max health reduced by 50%.
Hardy (hardy)	● #B8860B	Grants absolute immunity to all crowd control status effects, including Stun, Sleep, Petrify, and Freeze.
	● #2E8B57	Tarres attackers. Any contact or hit on this mob applies the stackable Tarred effect, slowing down target movement.

3. Added Custom Status/Potion Effects

Apart from visual medallions, the mod implements several custom potion effects that can be applied to both players and mobs. These effects interact dynamically with other game systems, items, and environments:

Effect ID / Reg Name	Display Name	Effect & Behavior
	Reflect	Bounces incoming projectiles back to the shooter. Chance is 20% + 10% per level. Resets homing sparkles to seek shooter's enemies.
xeb:bruise	Bruise	Weakens defense. Incoming damage is increased by an additional percentage of max health (5% + 5% per level).
	Bounty	Entity takes 20% more damage. If killed while active, the killer gains All Stats Up II for 30 seconds.
xeb:burn	Charring Burn	Reduces physical/melee damage dealt by 10% + 5% per level (range/magic unaffected). Instantly extinguished/removed in water.
	Delayed Pain	Damage accumulation. All damage is blocked and stored until the effect expires (duration reaches 0). The total sum is then dealt as indirect magic damage, correctly attributing the killer.
xeb:charged_fist	Charged Fist	Melee or air-swings spawn 2-3 homing Sparkle projectiles that steer towards enemies. Cooldown scales down with potion level.
	Holy Shield	Completely absorbs the next single instance of damage, then pops with a golden particle burst.
xeb:petrify	Petrify	Stuns and freezes the entity. Disables movement, target lookup, and attack commands.
	Tarred	Stackable speed reduction. Each stack reduces movement speed by 20% (max 5 stacks / amplifier IV). Applied by Sticky medallion.
xeb:sandstorm	Sandstorm	Local weather effect. Deals 1 damage/second to non-sandy entities in a 5-block radius.
	Mana Drain	AoE mana reduction. Siphons mana from nearby entities and converts it into magic damage.
xeb:mana_leech	Mana Leech	Mana siphon. Drains mana from the target and transfers it back to the applicator if within range.
	Marked	Weakens target, disabling their ability to dodge attacks via Adrenaline. Target takes 15% increased damage.
xeb:no_health_regen	No Health Regen	Blocks all forms of health recovery, including passive regeneration, potions, and food healing.
	No Mana Regen	Completely blocks active mana recovery.
xeb:fear	Fear	Causes the entity to panic and run away from the source of the effect.
	Madness	Erratic behavior. Forces random movements, strafes, and targeting chaos. Boosts attack stats.
xeb:magic_weakness	Magic Weakness	Increases magic and potion damage taken by the entity.
	Blindness	Restricts vision of players; reduces targeting range of mobs to 1.5 blocks.

	All Stats Up	Increases all primary attributes: attack damage, armor, max health, speed, and luck.
xeb:all_stats_down	All Stats Down	Reduces all primary attributes, weakening the target across all statistics.
	Doomed	Instant death timer. When duration reaches 0, deals Float.MAX_VALUE magic damage to guarantee instant death.
xeb:exhausted	Exhausted	Linked secondary effect. Reduces attributes (speed/damage) for a duration after Adrenaline wears off.
	Adrenaline	Boosts speed and grants 40% projectile dodge. Triggers Exhausted when it expires.
xeb:kinetic_spikes	Kinetic Spikes	Launches homing Sparkle projectiles towards the attacker when the host is hit.
